Hash Algorithms	SHA-256, SHA-512

Declaration

I, **High Priest Zevios Metathronos** (Ἀρχιερεὺς Ζεύιος Μεταθρόνος), founder and High Priest of the Temple of Zeus (Zevism), hereby place on the public record the following cryptographic hashes corresponding to the master archive of the Temple of Zeus intellectual property corpus, in both its plaintext (non-encrypted) and encrypted forms, as those files exist on this date.

These hashes constitute mathematical fingerprints of the underlying files. Any later modification of a single bit of either file will produce a different hash, and any third party can independently re-compute these hashes from the corresponding archive to verify identity. Publication of this document on a public, timestamped repository (Internet Archive) establishes a verifiable point in time at which the work, in this exact state, demonstrably existed in the possession of the undersigned.

This filing is made for the purposes of (i) authorship attribution, (ii) priority of creation, (iii) defense against fraudulent claims of prior or independent authorship, and (iv) supporting enforcement of the Temple of Zeus copyright, trademark, and licensing instruments under applicable national and international law.

I. Original File: Non-Encrypted

Filename of underlying archive:
`TempleOfZeus_IP_Master_Archive_2026-05-06_v1.7z`

The original non-encrypted master archive from which the encrypted file below was produced.

Verification Instructions

Any party in possession of either of the referenced files may verify the authenticity and integrity of that file by independently computing its SHA-256 and SHA-512 hashes and comparing the results, byte for byte, against the values published in this declaration. A successful match confirms that the file is bit-for-bit identical to the file that existed in the possession of the undersigned on the date of this filing.

Platform	SHA-256 command	SHA-512 command
Linux / macOS	`sha256sum FILE` `shasum -a 256 FILE`	`sha512sum FILE` `shasum -a 512 FILE`
Windows (PowerShell)	`Get-FileHash FILE -Algorithm SHA256`	`Get-FileHash FILE -Algorithm SHA512`
7-Zip (GUI)	`Right-click → CRC SHA → SHA-256`	`Right-click → CRC SHA → SHA-512`

Legal Notice & Reservation of Rights

All textual, doctrinal, liturgical, theological, ritual, design, iconographic, structural, and pedagogical material contained within the Temple of Zeus IP Master Archive referenced above is the original intellectual creation of **High Priest Zevios Metathronos**, produced for and on behalf of the Temple of Zeus (Zevism). All rights are expressly reserved.

Copyright in the underlying collective work, and in each constituent component thereof, is held by the Temple of Zeus and its authorized rights-holders. Unauthorized reproduction, distribution, derivation, or commercial exploitation of the protected material is prohibited and will be prosecuted under applicable copyright, trademark, trade-secret, and ecclesiastical-property law in every jurisdiction in which infringement occurs or in which the infringing material is made available.

Publication of this declaration on a public archival service does not constitute publication, dedication to the public domain, or licence of the underlying protected material. The encrypted archive is published in cipher form solely for the purpose of public timestamping; its contents remain confidential and proprietary.

Any copy or transmission of the protected work that is shown to be bit-for-bit identical to the file whose hash is recorded herein, and which is found in the possession of any party other than the undersigned or his licensees, shall constitute prima facie evidence of unauthorized reproduction.
